## 025: Schools at Somerhill

**Client:** The Schools at Somerhill

**Main Contractor:** Bryen & Langley

**Consultants:** BBS Technical Services

**Project Value:** £119,000.00 (Filtration)

**Completion Date:** December 2008

### Project Overview:

This new swimming facility is located within the walled gardens on the grounds of the Schools at Somerhill, Kent.

The centre contains a 25-metre four-lane swimming pool, with depth ranging from 1.0m to 2.0m caters for all swimmers from competition standard to beginners.

F T Leisure were appointed to carry out the complete design, supply, installation and commissioning of the water treatment and filtration systems. The system is based on standard sand filtration combined with sterilisation in the form of ultra-violet.

The chemical dosing system incorporates a Granudos Calcium Hypochlorite Dosing system, which also control the pH levels of the pool water.

The facility was opened on time in January 2009.
